# Critical

## TELEPHONY

Benefiting from the experience gained since 1909, LELAS phones show exceptional quality and resistance in all environments: climatic, chemical, vandalism, clean room (international standards ATEX) and for all technologies (GSM, IP, analogue switched CB or LB) with a complete range of suitable boxes.

## SIGNALLING & ACOUSTIC

## INTERCOM

## PA/GA SYSTEM

## SIGNALLING & ACOUSTIC

To improve communication, LELAS has created a whole range of equipment to adapt to all environments: flashing beacon, howlers, amplified speakers, headphones, display, relays, remote controls...

## INTERCOM

Adopting the same features as phones, LELAS intercom systems can be adapted to the most precise needs of all civilian and military organizations: factories, hospitals, refineries, railway stations, airports, railways, ports, canals, Agglomerations.  
IP or long range analog, mono or multichannel, open or centralized, LELAS systems already secure the communication of thousands of sites (with specialized calls, general calls, alarms, memories, remote monitoring etc)

## PA/GA SYSTEM

Our PAGA systems, specially developed for the industry, in conjunction with our intercom and telephone networks will enable you to secure your broadcast and alarm functions in all circumstances.

## ACCESSORIES

# nications

## ACCESSORIES

LELAS offers a wide range of accessories to facilitate your communications in all circumstances: stainless steel and composite acoustic hoods, pedestrian terminals, vehicles, solar, call box, emergency stop "punch" button.

## WATCHES

# areas Telecommu

## WATCHES

Legacy of the French watchmakers LEPaute and ATO integrated in LELAS, our range of digital and analog clocks can be integrated in all industrial, naval, explosive environments.

## PRESENTATION

Since its inception in 1909, Le Las has set itself aim of solving problems of communications in the most difficult environments. The equipment of the fleet of the Navy to firedamp mines in the beginning, Le Las extended its experience and dynamism to the most varied environments, sea, rail transport, ports and airports, chemical plants, oil or simply urban, energy sectors, laboratories and hospitals, civil and military administrations, etc ...

According to the certified ISO 9001 quality procedures, totally computerized design and manufacture services adapt the most recent technical inputs (like already GSM or voice over IP) in a full range. The development of electronic and mechanical modules allows us to offer a wide range of easily customizable products for the most reduced costs..

### Strengths

Over 100 years of experience, dynamism and expansion !Continuous innovation and mastery of the most efficient technologies for secure communication.A unique reference due to the synergy of the 5 leading companies in their field.

## HISTORIC

LE LAS group was created in 1909 with vocation to ensure the security of communications and signals in difficult environments, with the main markets :Navies and merchant : shunting telephony and rescue, transmitting orders.Collieries : security phones and telecommunication.

Hence the natural development of expertise focused on the safety of voice and data communications.Le LAS group specializes in major areas of action of the world of secure communication.

A reference that relies on big brands trust. Local Communities, ADP, RATP, Autonomous Ports, Brussels Metro, are concrete examples.
