MEK PIPING

industrial services

MEK PIPING SRL sets itself objectives of continuous growth in the industrial field, assuming leadership positions in the plant engineering and construction sectors for the engineering, shipbuilding, oil refining sectors, and again for the chemical, petrochemical, cement industries, and for the textile, pharmaceutical, thermoelectric, off-shore and ecology industries.

Specialized in the construction and assembly of energy production plants, MEK PIPING S.r.l. carries out the following activities: Design, prefabrication, supply and assembly of piping;

- Execution of revamping works for any type of plant
- Design and installation of oil & gas, biomass plants;
- Construction of aqueducts, gas pipelines and methane pipelines;
- Testing and rehabilitation of offshore platforms;
- Assembling ovens and silos;
- Basic and detailed engineering services for civil and industrial plants.

CERTIFICATIONS

QUALITY & SAFETY

High safety standards must be guaranteed for any component used in complex industrial plants.

For this reason, each of our manufactured articles is carefully checked in terms of chemical structure, mechanical peculiarities, dimensional properties and certified on the basis of current reference legislation.
